World's first solar park featuring hydrogen-producing PV modules takes shape in Belgium

Belgium is building the world's first solar park featuring hydrogen-producing PV modules, integrating 50 kW of Solhyd panels into a 2 MW solar farm in Wallonia. The project will generate both electricity and hydrogen, marking a commercial-scale debut for Solhyd's sunlight-to-hydrogen technology.

ETCH

ETCH, Inc. opens RFP for Cost-Effective Hydrogen Project Partners

ETCH is seeking an additional 1-2 partners to execute a project with our revolutionary low-carbon hydrogen and solid carbon production technology.

The ETCH Process™ delivers cost-effective, clean hydrogen & critical carbon materials from natural gas. This limited opportunity can offer early adopters a significant competitive advantage to securing reliable, economic gaseous hydrogen to support ongoing operations and decarbonization of assets. With only a few partnership slots open, interested organizations are urged to respond promptly.

SHEA Funding Opportunities

Want to join the Southeast Hydrogen Energy Alliance?

SHEA offers a unique value proposition as the catalyst for a sustainable future in the Southeast and beyond. By joining SHEA, you gain exclusive tools to help increase your company's commerce, educational materials to help back your every decision, and access to a thriving community dedicated to transforming the region into an epicenter of clean energy. Your SHEA membership helps secure a brighter, greener tomorrow.
